

Abstract submission for EEBA 2016 is open!

Abstract submissions on all aspects of eye banking are welcome, although we have identified a number of topics of special interest which we would particularly like to see featured at EEBA 2016:

- How many endothelial cells are necessary to release a graft for PK, DSAEK, and DMEK?
- What is the acceptable post-mortem interval for performing a serology / NAT test for hepatitis / HIV?
- Quality parameters for anterior lamellar grafts: Which can be accepted and which cannot?
- Promotion of best practice for corneal donation - global & national perspectives.
- Exchange of tissue for ocular surgery within the EU and globally: What do competent authorities require?
- Tissue preparation in the eye bank: Experience, guidelines and standards.
- EEBA and EU: Summary of participation in guidelines and scientific committees etc.
- Corneal epithelial transplantation in corneal and expanded limbal cell transplants: Does the donor epithelium persist?
- Eye Banks & Regenerative Medicine.
- Endothelial transplant perspectives: Will Eye Banks be redundant 20 years from now?

Instructions for abstract submission:

- Download the abstract submission form using this [LINK](#).
- Fill in the grey fields (title, authors, institutions, first author e-mail – and text).
- For scientific submissions, we suggest you use a traditional structure with the following headlines in **bold: Purpose, Material & Methods, Results, and Conclusions**.
- The text field is limited to approximately 1700 characters including spaces.
- Save the file as a Word file.
- Rename the file as EEBA_NAME, where NAME is the family name of the first author.
- If you submit more abstracts, rename the file to EEBA_NAME_X, where X is a number.
- E-mail the file to jesper.hjortdal@dadlnet.dk
